The application has been amended as follows:

The first paragraph of the specification was amended to read as follows:

The present invention is a continuation-in-part of U.S. Application Serial No. 09/929,873, filed August 14, 2001 **now US Patent 6,699,810**, and a complete application based on Provisional Application 60/442/932 filed January 27, 2003, the entirety of which are specifically incorporated herein by reference.

The title was amended to read as follows:

Method of Producing Hybrid Tubular Metal/Ceramic Composites and Resultant
~~Products~~

Claim 1 was amended to read as follows:

Claim 1 (Currently Amended) A method of making a tubular ceramic/metal composite comprising

associating at least one ~~tubular~~ **tubular** metallic element with a polymeric ceramic precursor having a thermal expansion lower than (said metallic element with! s-aid at least one tubular metallic element to form a preceramic composites and

subjecting said composite to pyrolysis by high frequency microwave radiation, until the polymeric ceramic precursor is converted into a ceramic having said at least one tubular metallic element integrally formed as part of said composite.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The primary reason for allowance is that the cited prior art fails to disclose or reasonably suggest a method of making a tubular ceramic/metal composite by associating a polymeric ceramic precursor or a fiber reinforcement infiltrated with a polymeric ceramic precursor and at least one tubular metallic element to form a preceramic composite and thereafter pyrolyzing the composite with high frequency microwave radiation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
